DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-24, 26-28, 34, and 35 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 16, the applicant has failed to provide structural relationships between the tooth and the member and clamp. Is the tooth required? Note the phrase "adapted for".

With respect to claim 24, note that the applicant has failed to orient upper and lower surfaces of the member, i.e. relative a use position.

With respect to claim 26, it is unclear as to how the tooth "communicates" with the aperture. Note that the tooth has never been recited as being engaged with the aperture. Were the applicant to properly recite this relationship, the claim may be allowable.

With respect to claim 35, the preamble recites a method for securing to a beam, however, no beam has been recited in any of the method steps. Further, it is unclear as to how a clamp "slidingly disposed on the member;" results in "urging the tooth into the aperture. Correction is required. Were the applicant to properly recite these relationships, the claim may be allowable.

HB1

Application/Control Number: 10/620,146

Art Unit: 3634

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-19, 21-25, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Flora et al #5,711,397. Flora et al, as best seen in Figure 3, disclose an anchorage device 10 comprised of a hollow rectangular member 40 having apertures 42 that receive projection 64 that is secured to sliding clamp member 48, 50 through clamp apertures 54a 54b, the projection having opposed surfaces one of which is farther away from the midpoint of the member and the projection secure to the member perpendicular to the longitudinal axis of the member, and second clamp 46, 100.

Allowable Subject Matter

Claims 20, 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim, any intervening claims, and rewritten to overcome the Section 112 ambiguities as noted above. The primary reason for the allowable subject matter of claim 20 is the inclusion of a second surface of the tooth angled away from the mid point of the member. For claim 29 it is the inclusion of a ratchet pawl attached the housing of the sleeve and a jaw attached to the sleeve. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Application/Control Number: 10/620,146

Art Unit: 3634

Conclusion

Page 4

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lycett 36,691,827, Olson et al #5,863,020, Gagnon #4,541,155, and Whitmer #4,037,824 are cited to teach clamping assemblies.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hugh B. Thompson II whose telephone number is (703) 305-0102. The examiner can normally be reached on Monday thru Friday 9 am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Cuomo can be reached on (703) 308-0827. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
